Your Complete Building Solution

Kemmco Sales has exceptional experience handling your steel building needs. Your steel building will be made in America from American-made steel. We will work closely with you to make sure all of your needs are met. From your purchase, to your design, to the layout and install, we will be there every step of the way.

Not only will Kemmco Sales sell and design your steel building, we will also be able to help you insulate and outfit it. We don't just offer the steel building alone. If you are building space for new offices, we have a vast variety of office furniture, where we provide floor layout plans and install. If you are building a new warehouse, we can provide all the shelving, pallet racking, flammable cabinets, storage cabinets, ladders, rolling carts, spill kits and absorbents, and much more. Kemmco can build with you from the ground up, start to finish. With our competitive pricing and untouchable partnerships, we can make sure your project goes smoothly, finishes on time and stays on budget.

Our buildings are designed for a wide range of applications whether it is commercial, industrial, agricultural, manufacturing, educational, institutional, or recreational. Our dedicated approach delivers exceptional quality, predictable outcomes, continuous growth, opportunities and mutually beneficial relationships.

Your Complete Building Solution

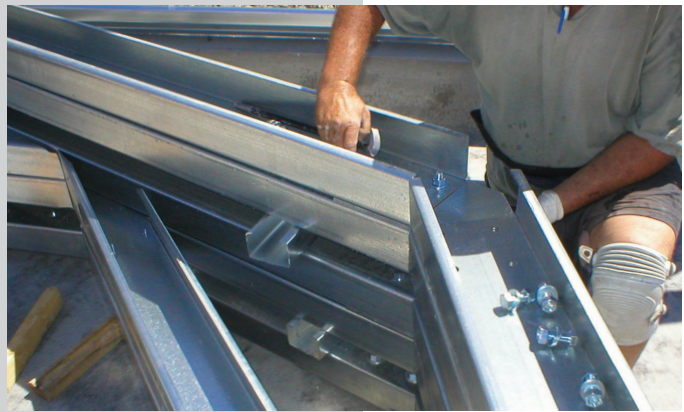

Made in the USA

All of our buildings are made in America, by American workers and with 100% American-made steel. Superior quality materials, skilled craftsmanship and cutting edge technology. Compare what we offer and you will see why our buildings are America's best!

Do-It-Yourself

Our buildings use light-weight, bolt-together components that do not require the use of special equipment, tools, or cranes to construct. With the help of a few friends, you can have your building up and running in a few short days, saving you expense on contractors or renting tools and equipment.

Affordable

Our buildings are designed by experts with value, strength and durability in mind. With easy construction for the first-time builder, our structures provide years of maintenance-free service at prices well below alternative methods.

Our Company

Our Company is a small, local, family-owned company dedicated to your happiness. We know the value of good, working relationships and the promise of an old-fashioned handshake. The rest of this flyer will walk you through what our company has to offer. We greatly look forward to working with you!

Rigid Frame

The virtually maintenance-free solid steel I-Beam building ensures stability, strength and durability.

The virtually maintenance-free solid steel I-Beam building ensures stability, strength and durability. These structures do not require support posts or columns and can span to widths up to 100 ft and lengths of 500' ft. Our durable rigid frame metal buildings are 100% Made in the USA. All of our steel is tested to the highest standards of quality, ensuring compliance with all relevant construction codes.

KemmcO designs for a wide spectrum of residential and commercial projects including Athletic Facilities, Agricultural Storage, Barns, Airplane Hangars, Workshops, Military Buildings, Government Buildings, Industrial Storage, Commercial Warehousing, Machine Sheds, Garages and Workshops, and all other types of steel buildings.

WARRANTIES

- 60-Year Limited Structural Frame • 40-Year Limited Paint Against Cracking, Flaking, or Peeling
- 40-Year Limited Rust-Through Perforation on Roof Panels
- 30-Year Limited Paint Against Chalking and Fading • Lifetime on Stainless Steel-Capped Fasteners

Rigid Frame Color Choices

Arctic White	Parchment	Ash Grey	Charcoal Grey
Lightstone	Buckskin Tan	Chocolate Brown	Burnished Slate
Slate Blue	Harbor Blue	Evergreen	Antique Red

Cold-Formed Steel Buildings

Designed for fast, easy construction, cold-formed steel buildings (CFSB) are a lighter gauge, reliable, innovative and cost-effective alternative to traditional rigid frame building types.

Created through a process called cold-formed manufacturing, which involves running steel sheets through a series of rollers, these buildings are easier and faster to raise than traditional steel buildings since they do not require the use of heavy construction equipment. But don't let the name fool you - cold-formed steel may weigh less than traditional red iron framing, but it still offers optimal structural integrity. Unlike wood structures, CFSB will not warp or crack over time, and they're inherently resistant to termites and other pests.

Choose from a variety of styles—American Barn, Gambrel, Gable, Single Slope or any combination of these. Options such as mezzanine floors, overhangs and variable bays can be added in the planning stage with the click of a button. Cold-formed Steel is widely used in residential, commercial, and industrial construction due to its versatility and sustainability.

Hawaiian Blue PANEL ONLY	Gallery Blue <i>Also in Trim</i>	Colony Green PANEL ONLY	Fern Green <i>Also in Trim</i>	

Arch Buildings

Looking for a quality, durable, and low-maintenance structure with maximum interior space? Kemmco arch-style buildings are your answer.

Made in the USA, these arch-style buildings provide ideal storage for grain, livestock, hay, machinery, and equipment, with extra room for a workshop. Stronger than traditional pole barns and vermin-resistant, they're built to last. Constructed from premium AZ55 Galvalume® coated steel—seven times more rust-resistant than galvanized steel—each building comes with a 50-year limited perforation resistance guarantee. Each building is engineered to withstand harsh weather, including heavy snow, hurricanes, tornadoes, and earthquakes.

Kemmco's high-tech manufacturing and efficient design reduce production costs, making these buildings affordable. They're also easy to assemble—four people with basic tools can complete the build in just three days. Each building ships with a simple assembly manual and blueprints.

Available in widths from 20 ft. to 100 ft. with unlimited length, these versatile structures suit agricultural, storage, industrial workshops, warehouses, and barndominiums.

Carports & Garages

Kemmco's carports and tubular frame buildings provide reliable protection for your assets. Whether it's shielding your vehicle or RV, storing equipment, or creating a customizable workspace, our metal structures offer superior durability and weather resistance.
